MOUNTED OFFSET DISC HARROW

DESCRIPTION:

Farmworld Offset Disc Harrow is used as a secondary tillage implement after plowing. It is ideal for lump breaking, disposal of seedlings, shredding stubbles, shrubs and mixing it with soil. It is very easy to use, which can meet the needs of a farmer in other soil operations. Its work speed is higher than other tillage implements, operation cost is lower, and it is more economical.

Technical Specification

Model	FWMODH12	FWMODH14	FWMODH16	FWMODH18	FWMODH20	FWMODH22	FWMODH24
Frame (mm)	75 x 10 (angle frame) / 100 x 50 (channel frame)						
Axle (mm)	28 (Solid Sq. Rod)						
Disc Type	Boron Steel Disc (Notched in Front & Plain in Rear gang)						
Disc Size (mm)	610 x 6						
Disc Spacing (mm)	230						
Bearing Hubs	4		6			8	
Working Depth (mm)	250						
Working Width (mm)	1420	1630	1850	2060	2280	2500	2700
Mounted CAT	CAT II						
Weight (kg)	400	440	510	590	620	680	740
HP Requirement	35-55		55-75			75-95
