**Subject:** Regarding installation of AI-powered telematics kit and geo-referencing of machines...

**Reference:** Letter of Central Government on Dated 11<sup>th</sup> September, 2025.

As per the above referenced letter of the Central Government, regarding installation of AI-powered telematics kit and geo-referencing of implements/CHCs under the Agricultural Mechanization Sub-Mission Scheme has been received.

As per para 6.0 (vii) of the guidelines dated 05.05.2025 of the Agricultural Mechanization Sub-Mission (SMAM) every machine costing Rs. 1.00 lakh and above supplied under the scheme shall mandatorily be geo-referenced. Further, all self-propelled machines costing Rs. 1.00 lakh and above such as tractors, self-propelled crop reapers/reaper-cum-binders, paddy transplanters, and other such machines supplied to individual farmers and Custom Hiring Centres (CHCs) are required to be installed with an app-based AI-powered telematics kit. This kit will track the live movement and location of the machine and maintain a daily record of the work undertaken.

The dashboard of the telematics kit will be available to the beneficiaries, concerned CHCs as well as the District and State Nodal Officers of the scheme. Manufacturers are required to provide such telematics kit as a standard addition on machines manufactured after 01.06.2023.

However, necessary action should be taken at your level in the above regard.
